

INSPIRING UNIQUENESS

INSPIRING UNIQUENESS

You cannot blend in, if you were born to stand out.

Playtop is a team of dedicated, passionate and knowledgeable professionals, who through a global network of exclusive Playtop Licensees, are determined to inspire uniqueness around the world.

As a global team we bring safe, sustainable, environmentally friendly, innovative and durable play and leisure surfaces to every demographic on the planet and we strive to always inspire the World around us whilst embracing uniqueness in both projects and people.

We believe that every person in the World has value and is unique, and that it is embracing our differences, listening, interacting and

communicating with people that are different from ourselves which widens our horizon, opens our minds, and inspires us to inspire uniqueness.... through beautiful, creative, sustainable, and high quality solutions.

As individuals we celebrate being different, as a company we take pride in standing out.

PLAYTOP WITH NIKE GRIND

Intelligent recycling - less waste.

Unique, sustainable and high performance rubber intelligently retrieved from worn out sports shoes and incorporated in our recreational Playtop surfaces.

As an official Global Nike Grind Partner, we have developed the Playtop with Nike Grind system which is the only product of its kind that incorporates Nike Grind rubber from sports shoes to create a colourful range of fully tested, safe, durable and impact absorbing wet pour safety surfaces, designed for playgrounds and recreational applications.

By adding sustainable and high performance rubber material derived from recycled athletic footwear into our colourful EPDM wearing course, Playtop raises global awareness on the importance of upcycling and recycling and takes the lead internationally when it comes to the innovation and creation of environmentally friendly surfacing. A system we are proud to call Playtop with Nike Grind.

PLAYTOP

OUTDOOR

A fully tested flexible, safe, sustainable and colourful playground surfacing for all outdoor playgrounds and recreational spaces.

Playtop wet pour safety surface is a durable, joint-free, porous material made from rubber granules and polyurethane binders.

It is mixed and installed on site as a wet pour product and can be laid in any shape, either on a draining purpose-built base like compacted crushed stone or over existing asphalt.

The base layer is made from recycled tyre rubber and the top layer consists of finer EPDM rubber granules, available in many bright and attractive colours.

The elastic properties of the wet pour rubber surfacing provide cushioning to absorb the impact from a fall onto the surface. The greater the depth of the surface, the more impact can be absorbed. Playtop's unique base layer interlocks with the top layer to provide a strong interlocking bond that gives the system the optimal properties for a long life cycle, superior within the industry.

PLAYTOP

SPLASH PARKS

A porous rubber surfacing for aquatic parks and pool surrounds with antibacterial properties.

Playtop Aquatic is an attractive and porous rubber surface with anti-slip and antibacterial properties designed for use in wet-play areas.

There is no limit to the surface designs that can be made from the great variety of standard colours and innumerable customised blends. The same wide range of colours allow you to give the pool surround or splash pad surface a colour that stands out or blends in – as you prefer.

The great choice of colour is also an opportunity for customers to turn the

surface itself into an integrated and fun part of the recreational play surface.

Playtop Aquatic is furthermore an environmentally friendly and sustainable surface with antibacterial properties. Playtop Aquatic is safe, slip resistant and water permeable. Made entirely from high quality components.

PLAYTOP

SPORT COURT

An innovative and durable rubber surfacing for multi-purpose activity courts and leisure areas.

At Playtop we believe that social interaction is just as important as physical activity. With our attractive, dynamic and flexible Playtop Sport Court surface we encourage the combination of social and physical activity both on and off the court creating a fun and inspiring recreational environment.

Playtop Sport Court is a high quality rubber surface designed for multiple recreational sports and leisure activities – from Basketball and Football, to Gymnastics and Yoga.

A unique top coat provides improved slip resistance and minimises the risk of growth of moss and algae.

Playtop Sport Court is a cost effective multifunctional surface which caters for all age groups. For the best possible rebound of a basketball and other ball sports, this attractive and multifunctional recreational surface can be installed onto existing concrete or asphalt in good condition.

PLAYTOP WALK

A more enjoyable walking or biking experience.

Playtop Walk is a new water permeable surfacing system made from a unique blend of recycled REACH certified truck tyre rubber and natural decorative aggregate.

The fields of application of Playtop Walk range from pedestrian and bicycle paths to light equestrian traffic.

Through its even, resilient and slip resistant surface Playtop Walk meets the criteria to also qualify as an accessible surface for wheelchair users.

Playtop Walk is fully porous and offers high speed drainage and meets the requirements for SUDS (Sustainable Urban Drainage Systems). A practical low maintenance one layer solution, quick and easy to install.

PLAYTOP INDOOR

A non-porous, easy to clean safety surfacing system ideal for all kinds of indoor play areas.

Playtop Indoor is the perfect and sensible choice for indoor playgrounds as it has been specifically developed for areas where high pressure washing is not possible and where draining is not always available.

With its high quality pore sealed surface, Playtop Indoor offers both low maintenance and easy cleaning with no need for the use of chemicals.

Playtop Indoor is an excellent choice for indoor playgrounds at camping sites, shopping centres, nurseries,

airports, hotels and more. It can be supplied both as a decorative play surface and if necessary, in compliance with the European Norm EN1177 for critical fall height.

At Playtop we are intelligently green – also indoors!

PLAYTOP

SPHERES

A selection of unique, functional and highly decorative design elements made to enhance any play area.

Playtop has added a new dimension to surfacing through the development and introduction of Playtop Spheres.

These three-dimensional rubber shapes can be used for sitting on, running around or simply for admiring for the aesthetic expression they bring to playgrounds, recreational spaces, schools, nurseries and urban environments.

The great variety of colours and an availability of three different sizes (350mm, 450mm and 600mm diameter) provide an exciting and fun challenge for the architect, contractor, or playground designer to choose from the endless list of possible combinations and applications.

PLAYTOP AND THE PLANET

Playtop gives maximum consideration to the environment and to future generations of our planet.

New technologies, innovative processes and sparkling creativity enable us to recycle responsibly whilst meeting criteria of global health, safety and environmental standards.

The Playtop ownership group processes almost 20,000 tonnes of environmental friendly REACH compliant end of life bus and truck tyres every year. The clean rubber from this process is used as base layer for Playtop's high quality playground and recreational systems, whilst all steel is separated and given new life as reinforcement fibres in industrial concrete flooring and smelted to produce cast iron products such as road manhole covers.

All tyres processed in our plant are 100% recycled and reused.

Playtop surfaces are designed to be safe, durable and sustainable and offers the highest level of technical performance.

The long lasting, environmental friendly and fully tested systems from Playtop, reduce the risk of need for early repairs or replacements and makes Playtop the best and most responsible choice in the market, both environmentally and financially.

For test certificates, performance results and other technical documentation, please go to playtop.com or contact your local Playtop supplier.
